

Trail Improvements Hike

November 11, 2018

Recommendations

Sign at the End of the Bridge

- Indicate there is a map on the back of the sign board.
- See about getting a bulletin board installed.

Benches

- One to be placed by the small glade near the intersection of the return trail and the connector trail.
- One to be placed at the end of Mid-America Banks's property near the intersection of the return trail and the connector trail.

Digging Repairs

- Fix four turns on the first uphill that are washing out.
- Dig and add rocks at the first sharp turn on the downhill after crossing the top of the hill. Fill in the hole that is developing on the left side of the trail.
- Minor gullies at a couple places going across the outgoing trail ridge.

Chainsaw

- Three low hanging branches after the ramp at the top of the hill.
- Chainsaw a low hanging branch going downhill after the top of the first hill and cut a grape vine shortly after that.
- Cut the cedar tree hanging low just before where rocks were put in the muddy spot.

Lopping

- Lop thorny bushes in the glade.

Close Off

- The shortcut from the return trail at the end of the glade connector. Use brush from where the glade has been cleared.

Re-Route?

- The first turn past the place where rocks were put in the muddy spot.

New

- Clear brush at the place that is flagged for a split-decision ramp.
